

Remember to start with general questions about the picture

- ✚ What do you notice?
- ✚ What special time of year do you think this represents? Why?
- ✚ Do you think the flowers are real? Why/why not?

Put your “Llygaid Mathemateg” on. What do you see now?

- ✚ What is the ratio of eyes to ears?
- ✚ Which prime numbers can you see represented?
- ✚ Can you see any parallel or perpendicular lines?
- ✚ What fraction of the petals on a flower would one petal be?
- ✚ If there were two more chicks, what difference would that make to the number of pairs of eyes and ears?
- ✚ What shape do you think you would find if you unrolled one of the heads or bodies? Explain your thinking.
- ✚ Estimate how long you think the head of a chick would be if you unrolled it.
- ✚ What fraction of the animals are bunnies? Can you say this as a percentage or decimal?
- ✚ If this is 10% of the bunnies in the field, how many bunnies are there altogether?
