

DCI Nose is hiding some  
'flag' squares on the banner. How many 'flag'  
squares are there on the banner altogether?  
How do you know?

St David's Day 'Make it Reasoning

Estimate the number of people  
in the parade.

Information:

2 people for each square, 1  
metre by 1 metre

The pavement in this part  
of Cardiff Bay is 15m wide

**Make it reasoning....**

**True or false?** Half the flags are St David's flags.

**Convince me.** If there were 6 rows of flag squares in the banner, there would be 48 flag squares.
